| Summary | Lilo can't be inst | Lilo can't be installed | | | | | | |
| Description | | | | | | | | |
| 1.Insert Ubuntu ins | tallation CD, and b | oot system fron | n CD; | | | | | |
| 2.Run the installati | on steps correctly; | | | | | | | |
| 3.Skip grub and ch | oose lilo as load pro | ogram; | | | | | | |
| 4.Whatever locatio | n you specified for | lilo, lilo installa | tion is failed with ' | "Error Code 1 | ". | | | |

| Bug Ubuntu000001 | 8 – Review Partitic | n table lead to | password and install | fail | |
|------------------|----------------------------|------------------|---------------------------------|----------|---------|
| Project | Ubuntu Linux OS Testing | Version | 5.04 | Platform | IBM 9CC |
| OS | Ubuntu | Component | 2.Function – 2.1Installation | Priority | Р3 |
| Reproducibility | Reproducible | Submit | qinxie | Reviewer | caozhy |
| Summary | Review partition | table lead to pa | ssword and install fa | il | - |
| Description | | | | | |

1.Run install;

2.Partition the system correctly;

3.Format partition and setup the base system;

4. Return to view the partition table before set user and password;

5.Be sure no change is done for partition table and go back to user setting page;

6.System report installation can't be continued successfully.

Bug Ubuntu0000019 – Choosing ubuntu-image-386 as kernel allowing user to set root password during installation

| • | | | | | | | | | |
|-----------------|--------------------|--|-----------------|----------|---------|--|--|--|--|
| Project | Ubuntu Linux | Version | 5.04 | Platform | IBM 9CC | | | | |
| | OS Testing | | | | | | | | |
| OS | Ubuntu | Component | 2.Function – | Priority | P3 | | | | |
| | | | 2.1Installation | | | | | | |
| Reproducibility | Reproducible | Submit | qinxie | Reviewer | caozhy | | | | |
| Summary | Choosing ubuntu | Choosing ubuntu-image-386 as kernel allowing user to set root password | | | | | | | |
| | during installatio | during installation | | | | | | | |

Description

1.Run install;

2.Partition the system correctly;

3.Format partition and setup the base system;

4. Return to review the partition table before set user and password;

5.Be sure no change is done for partition table and go back to user setting page;

6.After system report installation can't be continued successfully, rerun step 2-5 more times;

7.Rerun installation from partition;

8.Choose ubuntu-image-386 as kernel;

9.At user setting phase, system will give the root password setting interface.

| Bug Ubuntu0000020 – Resetting root password only allow to retype the confirm password | | | | | | | | |
|---|---------------|---|-----------------|----------|--------|--|--|--|
| Project | Ubuntu | Platform | IBM 9CC | | | | | |
| | Linux OS | | | | | | | |
| | Testing | | | | | | | |
| OS | Ubuntu | Component | 2.Function — | Priority | Р3 | | | |
| | | | 2.1Installation | | | | | |
| Reproducibility | Hard | Submit | qinxie | Reviewer | caozhy | | | |
| Summary | Resetting roo | Resetting root password only allow to retype the confirm password | | | | | | |
| | | | | | | | | |

Description

1.Run install;

2.Partition the system correctly;

3.Return to review the partition table before set user and password;

4.Be sure no change is done for partition table and go back to user setting page;

5.After system report user setting fail, rerun step 2-5 more times(about 3-5);

6.Go back to partition and begin reinstall from this step;

7.Choose ubuntu-image-386 as kernel;

8. In the user setting page, root password setting is enable and input different original password and confirm password;

9.System report root password mismatch, and ask to reset password;

10.In reset page, only confirm password can be retype.

| Bug Ubuntu000001 | 0 - In login screen s | setup, the "test sou | nd" button is in | valid. | |
